

Fort Point Project Management Relocates Child & Family

BOSTON, Mass. – January 25, 2010 – Fort Point Project Management (FPPM), a provider of real estate project management and relocation planning services, announces the successful relocation of Child & Family, a leading provider of community-based and school-based programs for Newport County in Rhode Island.

The new Child & Family Community Center, a 38,736 square foot, \$7.5 million facility located on John Clarke Road in Middletown, RI, designed by Vision 3 Architects and constructed by E. W. Burman Construction Company, includes a state-of-the-art Child Care Center, Counseling Center, Elder Care Services Office, Family Services Office, and other administrative offices. The Child & Family facility is the first building in the State of Rhode Island to utilize National Grid's "Advanced Building Systems" program and will be classified as a High Performance Building by exceeding all required code standards. In addition to the many programs and services to be provided in one location, the new facility will have a large community room for general use by service organizations, and service providers in the area. Sheehan's Office Interiors supplied new workstation, office and meeting room furniture.

Fort Point Project Management served as the relocation manager, providing relocation planning and management for the move from three different Aquidneck Island locations to the new facility. This allows Child & Family to consolidate the many services and programs it provides residents in Newport County, into one centralized building. This important change allows those in

need to obtain services more conveniently in addition to saving on operating costs. Sterling Moving and Storage served as the movers and NetCenergy as the technology design and installation consultant.

Working closely with Child and Family's Building Committee and Move Team, Fort Point PM successfully planned and implemented the relocation of 85 staff members and child care facility. This collaborative effort benefits the community and was recognized as a success by Michael Pearis, COO who commented,

"Several people have stopped to tell me how seamless this move was for them and their departments. Thanks to Fort Point PM, our teams have been able to focus on our serving our clients, with the knowledge that all the move details have been taken care of."

About Fort Point Project Management

Headquartered in Boston, Fort Point Project Management (formerly known as Corporate Project Partners) provides real estate project management and relocation planning services to clients in the corporate, R&D, academic, non-profit and healthcare industries throughout New England.
